

Tips for improving Audio/Video on Zoom

To improve the audio/video quality on Zoom, we suggest these troubleshooting tips:

1. DISABLE HD VIDEO setting. Video camera in lower left > Video settings. This will reduce the bandwidth demands of the video feed.
2. Close all unneeded browser tabs to reduce bandwidth demands.
3. Turn off the webcam and only use audio to prioritize that over video.
4. Have teacher only enable one microphone at a time to reduce cross-contamination of the audio feed.
